

**1. Product list on the right side of the home page:** product category and product name on the upper left. We want to put the product name and product category on the same level, and then make the black background more transparent.

**2. About our page:** Please change the picture on the left to a large full-screen picture so that we can see the effect.

**3. Service page:** Please also change to full screen large image, please remember that the large image of each page can be uploaded separately, they do not use the same set of images.

**4. Blog list page:** First we want to center our blogs horizontally and also the blog list page image and text section horizontally, the white gap between 1 and 2 becomes narrower, and if the list slides down and doesn't automatically load a new page add a loadmore button as shown in the image.readmore will make the text purple when clicked. We want to change the color of the text to another color, because the purple text on the blue button does not match the

color, you can change it to another color or click it to keep it white.

5. **Blog details page:** 1. Please remove the thumbnail at the top of the blog details page, we want to display the blog title directly in the details page

(horizontal center). Then the author of the date (centered horizontally) and finally the body of the blog (typeset normally).

**6. Contact Us page:** 1. The picture should be a large full-screen display, and the background can set the large picture of this page separately. Please change the page layout to the left side of the picture on the right.

**7. Product details page:** The left and right structure of the design should be adopted like the home page. The left side of the multi-picture display of products is full screen, the right side is text, and the logo is horizontally centered.

8. **The Menu:** we need to have a Menu: Products, the About, Service, Blog, Contact. The Menu and the back of the three line to choose a design, we suggest keep the Menu, the button three horizontal lines are removed, and the Menu button up near the search button.
